✔ Prepare a list of potential data sources and actors, as part of the migration data mapping process. This should include qualitative data provided by a wide range of stakeholders, including those who are at risk of being left behind such as undocumented migrants, women and children and youth.

✔ Refer to existing data sources as much as possible and build on existing data processes.

✔ From the gathered sources, look at data already captured and how it is used.

✔ Consult metadata and assess data comparability.

✔ Review the structures and mechanisms that are related to your country's chosen GCM objectives, including institutions, strategies, legislation and policy frameworks.

✔ Organize consultations with diverse stakeholders to brainstorm about GCM interventions, in particular regarding target beneficiaries, implementing partners, resources needed for implementation and existing technical capacity.
