JOIN THE DISCUSSION

At the heart of the GCM and the efforts of the States to work towards an orderly, safe and regular migration, is a person whose challenges and hurdles were thoroughly discussed and dissected during the different stakeholders' meetings leading to this Regional Review in Asia and the Pacific.

*The ICRC invites you to **an open discussion**, firstly about people's stories and journeys; and secondly about what it is humanitarians are trying to achieve when assisting vulnerable migrants. Through the lenses of ICRC senior humanitarian experts on protection, armed and security forces, on forensics, we aim at showing the complexity of the humanitarian issues at stake and giving the floor to others in the region to share their experience and point of view. We will present short videos and will set aside time for a Q&A session.*
